Versana Premier™

Easy to use. Easy to learn. Easy to diagnose.

Some innovations feel so natural from the start,
you wonder how you ever lived without them

Versana Premier

Easy to use. Easy to learn. Easy to diagnose.

Investing in and introducing a new ultrasound system to your practice can be a significant and challenging decision. Versana Premier helps clinicians enjoy the sophisticated yet familiar simplicity of an ultrasound system that feels natural from the start, making it easier than ever to deliver quality care to a wide range of patients every day.

Easy to use and easy to learn, Versana Premier lets clinicians easily and confidently diagnose a wide spectrum of patient conditions. Whether you're working in a women's health center, general practice office, health checkup or other site offering OB/GYN care, you can count on Versana Premier as a reliable and user-friendly ultrasound system designed to empower clinicians, enhance their efficiency, and provide optimal care, all with effortless productivity in mind.

Easy to use

From its design to its automated tools to its reliable service and support, Versana Premier delivers an effortless user experience.

Transform your workflow and accelerate scanning with advanced, intuitive features

-  Experience up to 38% faster workflow with *Whizz clinical features*, saving time and simplifying workflow¹
-  Create your own report templates with *Whizz Report* and import and display datasheets for references while scanning with *Whizz Notes*
-  Use new on-console features, including single-button flow shortcuts like *Assistant*, to fit seamlessly into your daily routine

Advanced design and capabilities to simplify operations and meet the needs of your practice and patients

-  Easily move the system around your facility with its portable design that is equipped with enhanced ergonomic updates, improved accessory management, and extended battery-powered scanning.

Easy to learn

Versana Premier offers an array of clinical and product education resources to help you and your staff master the system quickly, broaden your range of exam capabilities, and spend more quality time with your patients.

Robust educational support, advanced tools, & reliable service provide a comprehensive solution for users' practices both now & in the future

Completely backed by GE HealthCare for education and service with *Versana Club*, *My Trainer*, and *eDelivery*

1 — Maximize your efficiency and train new users with built-in reference and guidance tools, including *Scan Assistant*, *Scan Coach*, and *Scan Coach Voice Comments*

Benefit from the additional support tools such as *Imaging Insights*, which automatically optimizes system and probe fleet investment plans, identifies staff assignment and training needs, and monitors the variability of staff usage patterns. Capabilities such as *Digital Expert Connect* enable users to easily collaborate virtually with colleagues throughout their network, no matter where they're located

Easy to diagnose

Powered by *VisionBoost Architecture*, Versana Premier is designed to provide optimal imaging and tools needed to perform broad range of common OB/GYN examinations, so that users can accurately make decisions and reach a diagnosis with the greatest of ease.

Capture exceptional images with advanced clinical features to address challenging cases across clinical specialties and care areas

See faster *3D/4D Renderings** supported by an updated graphic and processing unit

Optimize images while scanning with *Whizz* and easily enhance or suppress color signals with *Whizz Color Flow*

Effortlessly obtain the render start position with *Whizz RenderLive* to easily separate solid tissue in front of rendered objects for Static 3D/4D imaging

Shift between Smooth Mode and Sharp Mode to view image features as preferred with *Whizz Easy Style*

Put bigger smiles on patient faces with *V-Live 2.0* which gives you beautiful images that allow you to clearly follow baby's development

Use *Static 3D/4D Volume Imaging* to obtain anatomical views not possible with 2D scanning alone

Reduce your scan time with automated productivity and simplified fetal measurement tools

Quickly detect follicles and analyze their shape, volume and diameter with *Whizz Follicle* which then automatically populate into the report

Make automated 2D Measurements with *Sonobiometry* and *Volume calculations* with and *Auto Contour* for easy measurements which seamlessly populate to report

Record fetal growth data and structure descriptions using *Fetal Growth Curves* or charts to easily compare current and prior exams to track fetal development

Use *Tomographic Ultrasound Imaging (TUI)* to assess multiple parallel slices of a volume with a single touch or *Virtual Organ Computer-aided Analysis (VOCAL)* to visualize and calculate the volume of structures

Assess breast nodules with the *Breast Productivity Package* leveraging BI-RADS® Criteria

Easily compare current and prior exams and track treatment progress with *Follow-Up Tool*

Leverage a wide range of transducers, including new IC9-RS, which produces high resolution images for OB/GYN care
